

To whom this may concern... Any politician... Any lawmaker... Anybody in the political and legal room that can affect this ridiculous measure 110,

I personally have seen the devastation that the increased drug use is causing not only on the streets, but in homes here in Douglas county. There is a better way. Legalizing these drugs is definitely not a better way. We are destroying our future, by destroying our communities with these drugs. If we want safe communities, we have got to illegalize these harmful drugs once again. We've got to get back to educating our young people on the damages of it. We've got to put more funds towards prevention and education. Put more funds and attention towards our law-enforcement officers being able to arrest and remove from the streets, anyone under the influence of these drugs... Meth, fentanyl, cocaine, opiates, and I personally think the use of marijuana is damaging to our community as well . I work with a volunteer organizations, search and rescue, youth, for Christ, Hope clinic just to name a few.

Please consider the damage this measure has caused our communities!!!!

Standing on His promises and looking for His glorious return,
Margaret
