

Drugs provided and legalized creates more addiction and more addiction creates more homeless and more homeless creates more of a financial impact on our cities and our communities. If you make something hard to get and illegal, less of society is likely to get it openly and less are likely to get addicted to the substance since there is a consequence to getting caught and a consequence to possession and distribution.

These pet projects by liberals and democrats are backfiring and they are seeing the results of their stupidity. There is a reason for laws and lawfulness. There are reasons for morality and concepts that keep our communities safe and funded. Lack of safety lends to lack of support financially. Lack of support means a lack of trust, a lack of trust results in rebellion.

I know for a fact the reason the majority of our homeless are living disgusting existence on our streets and in our parks is that they have become addicted to substances that make it impossible for them to be an integral working part of our society and they are a burden in every way possible.

"Additionally, they found that 68% of cities reported that substance abuse was the largest cause of homelessness among single adults."

- 1. Homeless are not seeking medical care**
- 2. Homeless are not living in sanitary conditions**
- 3. Drugs are trafficked among the homeless to help them stay high and not have to seek help for their condition**
- 4. Homeless are defecating in our parks everywhere**
- 5. These people need mental health and Drug addiction recovery mandated**
- 6. Legal Drugs are the gateway to what I call Death Drugs and that in itself is a huge impact on our fire and ambulance and emergency**
- 7. Back to the street they go and no help is in sight because it is legal for them to get high and traffic drugs**

We need to incarcerate and force help on those that can be helped and the rest need to go to a mental health facility if the drug damage to their brain is so severe that they cannot be rehabilitated. Vagrancy laws need to be enforced/reinstated. This creates a pathway to rehabilitation that is not happening and our communities are disgusting cesspools of human indignity.
