

Hello, I would like to share why and how measure 110 has affected me personally.

In 2018, when I first heard about measure 110 my instant thoughts were, "well that's not going to end well" as my family and I were packing up and moving to Idaho.

A series of unfortunate events led us back to Oregon in 2020. Right when the pandemic started. The amount of people on the streets had increased to an alarming rate. People started openly using drugs...how could this have happened in such a short amount of time?!

As voters we were falsely promised that there would be treatment programs that anyone could go to whenever they decided it was time to get off the drugs. Yet here we are in 2023, struggling to find resources for any treatment of addiction. Yet these people have full blown access to fresh, clean needles and crack pipes! Do any of you realize how awful the state of Oregon is??

Do any of you care that so many people die in the streets of Portland everyday! To the point where citizens are now having to help bring people back to life! The solution is not more free stuff for addicts, the solution is to get drugs off the streets, make it criminalized again, send these people to jail...ya know the ones that NEED to be there. Help them, get help!

If you were to talk to any recovered drug addict, they would all tell you the same thing...they needed "get right" time meaning they needed to be incarcerated in order to detox and get their mind straight again. So that they could function in society once again.

You want to help Portland? Repeal measure 110! It will save lives and it will save our city!

All the lives lost due to fentanyl overdose is on your hands, Portland city officials, and Oregon legislature. This is on you. Most of my graduating class are DEAD! We've only been out of high school 10 years! This should not be our reality.

Do better and please, find it in your hearts to repeal measure 110.

Thank you and have a blessed day.
