

Measure 110 is a failure. It needs to be repealed. Either repeal it or put it back up for a vote.

If you're never been to 82nd avenue in SE or Foster Rd, or one of many neighborhoods with high levels of reported drug use and related crime you'd know what to do. But you've probably never bothered.

People are overdosing and dying every day. Over taxing EMS, emergency room services and police, how about we make a community where they're not playing wack a mole with drug overdoses and can respond to other types of emergencies in a timely manner. (Heart attacks and robberies are still happening BTW)

Measure 110 was a huge mistake. Put forward without any social system to back it up. If Oregon wants to be more like countries in the EU that have decriminalized certain drugs, it needs to have the right social and medical support system. But it does not. It's a big flop for the citizens of Portland.

Do something right for a change and stop this madness.
