

Measure 110 needs to be repealed. I see the affects of it every day. I work in downtown Portland. I work as a fingerprint examiner for the Portland Police Bureau. Part of my job is to fingerprint subjects in custody. Since Measure 110 was passed the amount of people on drugs and/or mentally ill people in custody has skyrocketed. And Measure 110 is essentially supposed to keep drug users out of jail! Drug use and mental illness go hand in hand, whether the person has mental illness already and chooses to self medicate with drugs or the drugs are causing this mental illness. Either way it is out of control. These people are not in jail because of the amount of drugs they possess, they are in jail because of the crime they commit while on drugs or the crimes they commit to feed their drug addiction. Please repeal this measure and save our state before this drug free for all destroys it. Thank you.
