

This email is in favor of repealing Measure 110.

Although the authors of Measure 110 and those who voted for it hoped that it would lead to more drug users seeking drug rehabilitation, this has not borne out to be the case. Although drug rehabilitation is an avenue that is available, Measure 110 has not decreased the drug addiction rate or improved the health of Oregonians.

Instead it has resulted in rampant drug use in most if not all of our cities and frequently in public. Downtown Portland used to be one of the most beautiful downtowns in the nation and now it has become a cesspool of urine, faeces, and rampant drug use. Before Measure 110, Bend (my hometown) had no homeless, drug users downtown. Now it is prevalent 24/7. There is a huge problem that needs to be rectified when my 9 year old kid has to step over passed out drug addicts to get to where we are going.

Please repeal this disaster of a measure
