

Dear Committee,

Addiction is a cruel disease leading to the vicious downward spiral of progressive sickness and at times early death.

Allowing the documented rise in overdoses and deaths to continue as a result of failed promised actions on Measure 110 makes us responsible for all victims including the innocent public.

Measure 110 must be fixed or repealed. We the public look to you to act quickly so drug users can be placed into early actively managed treatment and not be left to continue to use drugs at will , overdosing and perhaps, dying on our streets.

Very truly yours,

Sharron Fuchs
