

How has Measure 110 affected myself and my family?

My family has a small business and had a house in Portland. My two young daughters used to go to the neighborhood park two blocks away. Between driving from SE Portland to their school in NE Portland, we increasingly saw the decline. I always lock my doors, my girls didn't feel comfortable going to the park due to increased encampments and drug use. The school now is completely fenced in. Our business has barbed wire around the roof and steel cage on the front door, security cameras are some of the safety measures we have had to take to keep our family and business secure from drug induced zombies walking/driving/biking the streets nearby. We moved out of our Portland home to a safer space so our kids could enjoy their childhood with clean safer streets like kids should be able, Like tax payers and humans should be able to. We pay 1000s in all the taxes and get not much in return.

When we do come in to Portland, the decline is apparent. Coming off of I-205 onto Powell Blvd/Hwy26, so many businesses are fenced, boarded up to keep local users out. The amount of traffic accidents has increased reported by ODOT. There doesn't seem to be any repercussions for those abuse drugs, clog our streets and sidewalks. We are all paying in so many ways, the quality of life due to measure 110 is subpar.
