

Measure 110 is a mistake. When you increase access and reduce consequences to substances, use will increase. Our state's goal should be to decrease alcohol and other drug addiction, not just decrease deaths due to substance abuse and not just decrease convictions (for possession, distribution, driving under the influence and other crimes like domestic violence and theft enacted because of an individual's impairment, thinking errors or desperation.) Roll back Measure 110.

Our focus should be on educating all helping professionals, medical professionals/prescribers and decision makers on addiction, enabling and prevention. Our focus should be on developing research based, proven effective treatment options for all levels of care.
