

Hello,

I believe in freedom, free to live your life like you want.

But BM 110 must put restrictions on doing drugs in public. It is very dangerous for people that might touch or smell fentanyl.

Please give these people a space where they can live, or provide the family with money to watch out for them.

Only thing for certain is people with a particular gene makeup are susceptible to addiction.

We can't turn our back to these people many have an underlying mental illness. But we need to care for these people until a treatment plan can be established.

Please do something no action means more deaths on the streets.
