

Hard drugs on the streets of Oregon should not be legal! I haven't even been downtown Portland since after this bill was passed! I have family and friends who have gone one time and they will not go back! Our kids from NYC when they come to visit twice a year, they always go to Portland as they check out the latest restaurants and usually spend a night at a nice hotel.

My son-in-law went down there one day last November to go to the food trucks that had been on the best news places to eat and he could not believe all the homeless, drugs, needles, sketchy looking people, looked like the walking dead, feces, etc. and so they decided to go to McMinnville instead, and will never go downtown Portland again to shop, to stay, or eat at a restaurant! This is true of my entire family, and it is very large!

It looks like a Third World country down there and the DAs are letting out people that commit crimes over and over again and no one feels safe! That is why so many businesses left and I don't blame them! Nobody protects the victim anymore. It's all about letting these criminals run the streets and getting away with it every time just to go back again and repeat the offense over and over again!

The once beautiful Portland Oregon, the city of Roses now looks like a a shit hole!

I feel so bad for the people who are hanging on by a thread that have small businesses, or even the large businesses that have left! It is horrible. Our government has allowed and continues to allow. It must be stopped!!! Start arresting these people and keeping them in jail or get them in mental health facilities, get them off the streets and out of the neighborhoods!

Every time I read about something horrible happening somewhere it's usually in Portland. It's an embarrassment to even say that I live in Oregon, and I was born and raised here.
