

Hello,

I am a Portland resident who lives in Lents and works in the inner SE Industrial district. I see the disastrous results of BM110 out my front door all day and night. I strongly urge you to repeal it. I absolutely reject the idea that a repeal would be "criminalizing addiction" - a repeal would be criminalizing the behavior that leads to life-destroying addiction! That is the proper role of a civil society and the law enforcement working within it. The crystal meth and fentanyl and fentanyl-substitutes that are out there on the street right now are destroying people's lives. BM110 isn't compassionate, it is destructive in the most insidious of ways.

Sincerely,
Tom Borden
