

Dear Sir's and Mams,

BM110 should be abolished and make dangerous and leathal drugs illegal to possess, sell, and use. It is a failed experiment, there is no argument that makes the perceived freedoms beneficial to society. The needs of the weak few should not drag down the rest of a functioning society. Forced rehab, public intolerance, societal shaming, and a designated path to join the rest of us is the only solution. Any other path is pandering to weakness, organized crime, drug smuggling, corruption, and decay.
