

It should be apparent by now that measure 110 was not only ineffective at combating drug addiction but had the opposite effect of fueling the crisis even further. Regardless of the spirit in which this law was passed, it has failed...utterly and completely. This is not the time for hand wringing, justifications or egos...we need bold leadership. Addiction, overdose deaths and drug related crimes are all worse than they've ever been...that should be enough for leadership to see that we need to reverse course. End 110 now.
