

Comment:

My name is Glenda Scherer, and I live in Gladstone. I run a micro school where I teach students how to read and write. Students attend daily or several times per week. Tolls will destroy my business and other service based businesses that operate with in person customers.

Inflation in Oregon is crippling middle and lower income families. Our combined utility bill (waters, sewer, gas, electricity) was \$500 in January. And we are facing another 3% increase next month.

We have already paid for these roads, and we refuse to pay to use them. We are fed up with unelected, unaccountable bureaucrats taking actions that harm the well-being and livelihoods of working families. This is being done to try to change driving behavior.

I know what these unelected and unaccountable bureaucrats are thinking...We'll put the toll in and then substitize for those who cannot afford it. Then create a tax to pay for it. These unelected and unaccountable bureaucrats want to tax families out of existence.

We do not want your damn tolls.

We do not want your damn tolls

We do not want your damn tolls.

We do not want your damn tolls.

We do not want your damn tolls.

Thank you!
