

My name is Jim Baucom.

I'm born & raised 5th generation Oregonian.

We do not need tolls on interstate highways which have already been paid for by the Federal Government.

Maintenance repairs are covered through our gas tax revenue and are sufficient.

I suggest that you look at an audit of ODOT to trim the fat in the administrative roles to fully fund repairs.

In a world computerized and using AI, you don't need much administrative staff to support field workers doing the actual work.

We are not China and do not need to be tracked and discouraged car travel.

We have not voted for the WEF or UN, and do not need to bow down to their desire to rule and control free individuals.

You have the money to maintain the interstate highways that you desire to toll.

Actually budget your department, you greedy nameless appointed administrators
