

Tolls are a tax. You are raising taxes that will primarily hurt the middle class and below. For the average citizen adding tolls to their commute in this inflation economy is not helping anyone. The tolls will be used by those that can afford them and the rest will be packed into the free lanes if there are any. There is not alternative routes in this area for a bypass and no one is in favor of this except the Oregon government.

Please stop over burdening the citizens of Oregon and stop the tolls.
