

I am a firm believer in the improvement of current infrastructure however, taxing (tolls) the public will hurt the wrong people. Place a tax on real estate sales. It is a one time fee that the homebuyer will absorb for live in an area will tolls. Maybe anyone in the metro boundary. Put a fee on development like a SDC that would create moneys for road construction.

i specifically oppose the toll where it will impact communities that are used a "bypass" to circumvent the tollbooth's. I.E the historic neighborhood of Willamette in West Linn.

Thank you, James Manning
