

JTSSTP,

I attended the meeting yesterday in person and I am submitting my testimony online.

The Mayor of West Linn, Rory Bialostosky gave compelling testimony demonstrating how inefficiently this project is expected to be funded.

As we know government projects all miss their projected budgets, so in reality it will be even more grossly inefficient. It amounts to the government forcing its citizens to unwillingly pay a private company hundreds of millions of dollars just to take our money. PLEASE NO!

This is completely unreasonable. Full stop. You should be embarrassed for proposing this.

As a small business owner, this proposal is ludicrous. No business can operate with these margins/numbers. Can you imagine a business going to a customer with a proposal with these numbers?

This is insulting us and it should be insulting to the JTSSTP. This is best you can do??

Why would you punish people so badly to get what you want? If this is what you think of your constituents, we will remember this at election time.
