

Hello,

I would like to submit a comment hoping to get funding for North Peninsula zone Emergency Route updates. It has come to my attention that the bridges on Columbia Blvd and on Lombard are not ready for an earthquake and knowing that one is expected with a 1/3 chance of happening in the next 40 years is scary. These not being fixed in time could mean my family being separated. My kids go to school in St. John's on both sides of the bridges. And my husband and I work in Beaverton. If this quake were to happen during a work day it would be terrifying to know I couldn't reach my young kids in a timely manner. Or if this happens any other time, we would be stuck on the north peninsula with the possibility of a chemical spill from the river is also terrifying. Please help insure these projects get funded and taken care of in a timely manner to help keep all of us safe!

Thank you,
Taylor Shimek
