

We must have money from the state legislature to secure our emergency routes!

1. Unless we rebuild two railroad bridges and secure a tunnel section, both key freight corridors, by allocating match funds, the PBOT budget cannot handle the amount needed, approximately 20% of the estimated \$57 million, to secure safety for our region.
2. The other emergency route is Lombard and it needs a feasibility study.

Respectfully submitted,
Loren MccRory & Bill Whitcomb
