**Submitted written testimony to the Joint Committee on Transportation for the 6/4 Roadshow Hearing:**

We need to make the most efficient use of our limited resources to deliver the best transportation network possible, which means prioritizing active and mass transportation modes over privately owned automobiles. As a bonus, these modes are also less costly to operate and maintain and help to achieve our safety and environmental goals as a state! Say no to highway expansions! Say yes to bikeways, busses, and rail!
