Woodlawn neighborhood in Portland

**Submitted written testimony to the Joint Committee on Transportation for the 6/4 Roadshow Hearing:**

Fix & repair existing infrastructure, increase funding for local transit, increase cycling infrastructure to encourage more cycling, and do not expand freeways or otherwise add more automobile capacity. We desperately need to switch away from car-centric modes of transportation to more sustainable methods. I don't want to live in a future of triple decker 10 lane freeways full of cars transporting single drivers. I'd rather live in a future of safe, reliable, & non-polluting transportation methods for everyone, and saving our planet rather than using up all resources & burning it to the ground.
