**Submitted written testimony to the Joint Committee on Transportation for the 6/4 Roadshow Hearing:**

I want money spent on:

- 1- fast trains
- 2- maintaining the roads we have – at this point the potholes are an embarrassment
- 3- animal corridors/overpasses/underpasses
- 4- investments in seismic resilience
- 5- traffic enforcement

The research is clear: more lanes = induced demand = more congestion = more pollution.

It's 2024, not 1958. Follow the science, not outdated biases. Quit wasting our federal dollars on destructive boondoggles. Money spent on fast trains could change the entire regional picture.
