

To Whom It May Concern,

My family only has one car and primarily rely on Trimet and biking to move around the city and state. I walk my son to daycare and use the yellow line & Bus 44 to get groceries and go to his doctor's appointments while my wife has our car to go to work. Ridesharing costs too much and is bad for the environment. Increasing frequency on buses/light rail and adding more protected bikes lanes would make our lives much better. We would also appreciate more funding to bus travel to other parts of the state and within Portland. Please don't use money to widen any interstates or freeways. I would like to be able to travel quickly and safely with my son and wife without hurting the planet.

Best regards,  
Wyatt Archer, Portland Resident
