Submitted written testimony to the Joint Committee on Transportation for the 6/4 Roadshow Hearing:

I want to see our legislators pivot from car centric projects to increased public transportation, bike safe routes and walk able neighborhoods.

Cars are a major cause of climate change. They isolate people and diminish societal interactions.

We need massive change now. As our elected leaders, we are counting on you to make a transition to a sustainable future possible. This isn't a popularity contest. Do the right thing for the people that you represent.

Be a Climate Hero now!
