Submitted written testimony to the Joint Committee on Transportation for the 6/4 Roadshow Hearing:

I want legislators to prioritize the 2025 transportation package because I have a 4 and 6 year old and...

1. I want a future for them where they can breathe clean air. I want to REDUCE the number of highways and carbon emissions. Please don't build anymore highways. It's proven that building more highways and roads increases carbon emissions.
2. I want a future for them where they can safely and independently navigate the city they love via accessible, robust, ubiquitous and frequent mass transportation services.
3. I want a future for them where the skies don't turn orange and red every summer, and ash coats the ground.
