

Please prioritize bus transit and safer bicycling over more roads and freeways. We are having wildfires in Oregon and ash falling from the sky for weeks at time, so it is inappropriate to spend more on more roads and freeways. We need to encourage people to bike more and bus more. (Also, the more people that bus or bike, the more room there is on the roads for people who truly do need to drive.)

It is extremely important that you take action now, because Oregon is just going to get hotter and hotter, and smokier and smokier.

Thank you,  
Kris Anderson
