

# Serving Tribal and Community Riders

We provide Transportation to the Burns Paiute Tribal Community and to Burns and Hines five days a week with a deviated fixed route.

In November 2023, we received a new vehicle and now provide demand response service five days a week, including on weekends.

We have eight projects planned for the 2023-2025 biennium that include:

- Operations and mobility management
- A coordinated plan update
- Preventive maintenance
- A vehicle purchase
- Capital planning, match and contingency.

A staff of five carry out this work while operating two vehicles six days a week.

We have done a lot of community outreach and will continue, which provides knowledge about our current services and increases ridership.

We also have purchased a vehicle that should arrive in 2026 and are applying for funding to build a transit facility in our community.
