

Submitted testimony from Garlynn Woodsong, Portland below the line:

---

Trails and electric transit. We need to build a complete system of bicycle/pedestrian off-street trails, with the goal of ultimately connecting every property in the state with every other property using either off-street trails, sidewalks, or both. Electric transit can then be supported in more areas, allowing more people to free themselves from the burdens of automobile dependency.

Stop wasting money on widening freeways, you fools. Climate leaders don't widen freeways. Don't be climate arsonists.
