

Let me first start off by saying Trimet and because of their bus delays has cost me 2 jobs. The first job loss threw me into being homeless for a year because their bus was delayed trying to get me to amazon. Mind you my work commute was and is now 2 hours each way. I got ALL you BEAT on commitment to a job by a LONG shot. Keep the fares as low as you can. Be easier on people who are actively trying to better themselves. Keep the addicts and homeless off the busses and trains. I walked 7 miles and found 2 jobs in under 4 hours. If I can get myself off the streets so can anyone else there are NO EXCUSES. If life is too expensive, get a 2nd or 3rd job and stop complaining. MOST people are LAZY. I am not one of them. I went from homeless to making over \$6,433 per month AFTER taxes. If I can make it so can anyone else. Honored citizen saved me on multiple occasions but you make it really difficult for people to get one. If someone doesn't drive they have to find a way to their doctor. That's a pain in the ass. Also WHOMEVER designs your website needs to go back to HTML school. It could be designed WAY WAY better and you should have an online portal for physicians to fill out and sign digitally. This 2024 and almost 2025. GET WITH THE TIMES! I could code a site better than the current website.
