

**Increase Transit Services:** Dramatically enhance bus frequency and overall transit services to support the one in four Oregonians who cannot drive, ensuring better access to jobs, education, and healthcare.

**Invest in Safe Routes:** Fully fund Safe Routes to School and other safety programs to create safe environments for walking and biking, particularly on dangerous roads like SE Powell and Hall Boulevard.

**Focus on Maintenance Over Expansion:** Prioritize maintaining existing infrastructure and fixing roads and bridges instead of wasting resources on highway expansions like the Rose Quarter Freeway, which do not solve congestion and only increase pollution.

**Address Climate Change:** Implement a moratorium on freeway expansion and adopt policies aimed at reducing vehicle miles traveled to combat transportation-related carbon emissions, which account for 40% of Oregon's total emissions.

**Support Community Initiatives:** Invest in projects like the Albina Highway Caps, which enhance community well-being without exacerbating pollution.
