

Please prioritize these items in the 2025 transportation package:

1. I want to see transit service dramatically increased so I can get my kids to school w/o having to drive and concentrate so hard on a major freeway / I5.
2. I want to fully fund Safe Routes to School because I want my kids to walk and bike around safely in their neighborhood. Cars seem to speed down residential streets in 25mph zones.
3. Please don't widen any bridges or highways. We know this induces traffic. Fix the existing bridges and roads first.

All I want is clean air and water for my kids. The skies turning orange every year is too much.
