

Dear Committee Members

We are in desperate need to reduce our GHG emissions, and time is rapidly running out to meet Oregon's and Salem's goals of CO2 reduction. To put it bluntly, we are failing! Please put all your efforts into this. Spend our funds on improving cycling, walking, rolling, and public transportation. We do NOT need any more traffic lanes.

What we also need is to make public safety the number 1 priority in our transportation system, along with GHG reduction. They go hand in hand. We must make our transportation system cleaner and safer for the benefit of everyone.

Thank you

Ray Quisenberry  
Salem
