

Legislators: I am among the vast majority of Oregonians who overwhelmingly want to see our state money' invested in road maintenance, street safety, passenger rail, and climate action . We can barely afford these. We'd never be able to afford these—a 21st century transportation system we need—if we continue to write blank checks for billions of dollars for ODOT to continue to pursue their costly, polluting freeway expansion, or replacing Boone Bridge. Please read WILLIAMETTE WEEK's expose of how ODOT spent millions to try to manufacture support for projects like the Rose Quarter expansion. A shame, & a waste of our taxes.
