

We need better transit and properly protected bike lanes throughout the city; too many of the supposed bike thoroughfares are dangerous and often filled with debris from cars, or illegally parked vehicles. Freeway and Highway expansions should be halted entirely, instead of wasting billions on creating even worse problems for the future. You cannot solve congestion and parking with more cars; the only solution is fewer cars on the road and for that to happen you need people to feel safe and secure taking longer trips more often using public transit and bikeways.
