

Frog Ferry is both a daily commuting possibility and a necessity for Portland's resiliency in the face of disaster. The pilot project from St. John's to downtown River-place is just the beginning of connecting people to the river and to other neighborhoods, it will someday transport people from Vancouver to Oregon City. By people using the ferry in everyday life, they will know that it is way to cross the river in emergency situations. It is not a luxury to have a ferry system on the Willamette it is a necessity. Please fund Frog Ferry.

Respectfully, Patty Rueter
