Approval of Task Force Recommendations

Possible Motion: I move to adopt the Task Force Recommendations as presented.

Possible Motion: I move to adopt Task Force Recommendation ____ (specific recommendation).

JTFAI Rules: The affirmative vote of a majority of the voting members of the task force (7) is required to approve a recommendation.

Draft Recommendation

Terms and Definitions (Part 1)

The Joint Task Force on Artificial Intelligence recommends that AI-related terms and definitions in the National Institute of Standards & Technology (NIST) [Language of Trustworthy AI: An In-depth Glossary of Terms](#) should be the primary federal resource for drafting legislation in Oregon.

Secondary authoritative sources for AI-related terms and definitions include:

- International Association of Privacy Professionals' (IAPP) [Key Terms for AI Governance](#).
- International Organization for Standardization (ISO) and International Electrotechnical Commission (IEC) policy [ISO/IEC 22989: 2022](#).
- Organization for Economic Cooperation & Development's (OECD) [AI Principles](#).
- European Union's (EU) [EU Artificial Intelligence Act](#)

Draft Recommendation

Terms and Definitions (Part 2)

The Task Force also advises there may be industry-specific resources for AI-related terms and definitions; two examples are the Food and Drug Administration's [FDA Digital Health and Artificial Intelligence Glossary](#) and the National Association of Insurance Commissioners (NAIC) [Model Bulletin: Use of Artificial Intelligence Systems by Insurers](#).

Draft Recommendations Guidelines (Part 1)

When drafting AI-related legislation in Oregon, the task force recommends the following guidelines around terms and definitions:

- The Task Force recommends using terms and definitions related to the uses and applications of AI technologies, rather than specific AI technologies.
- Be cautious when adding AI terms to existing statutes and laws regarding prohibited actions (i.e., illegal activity) and consider how legislation applies to how people and organizations use AI in addition to AI technology.
- Recognize that AI technology is rapidly evolving, requiring ongoing legislative conversation and monitoring of its current and likely applications.

Draft Recommendations

Guidelines (Part 2)

- Consider the context if a definition in statute is needed by looking at existing Oregon law that may apply without a specific AI definition cited, or if a statute may need to be amended to clarify the use of AI or provide an AI use case as an example.
- Exercise caution when adopting other states' AI definitions, as statutory terms change and differ between states.
- When choosing definitions, technical and/or science-based AI-related terms and definitions tend to have more longevity.
