

- ▶ **Field work on Hayden Island will inform bridge design and construction methods**
  - Work will test three ground stabilization methods to measure their effectiveness
  - Findings will provide information necessary to help mitigate the potential for ground liquefaction
- ▶ **Duration: Q1 2025 to Q2 2025**
- ▶ **Funding:**
  - \$1M BIP Planning Grant
  - Existing IBR funding
- ▶ **Delivery Method: Design Bid Build**
- ▶ **Agency: ODOT**

**\$1,000,000**

On Hayden Island in 1915 Tacoma Dredging Co. pumped 116,000 cubic yards of sand to build a 40' wide 24' deep 1,480' long road embankment.
