

Oregon Clean Energy Plan

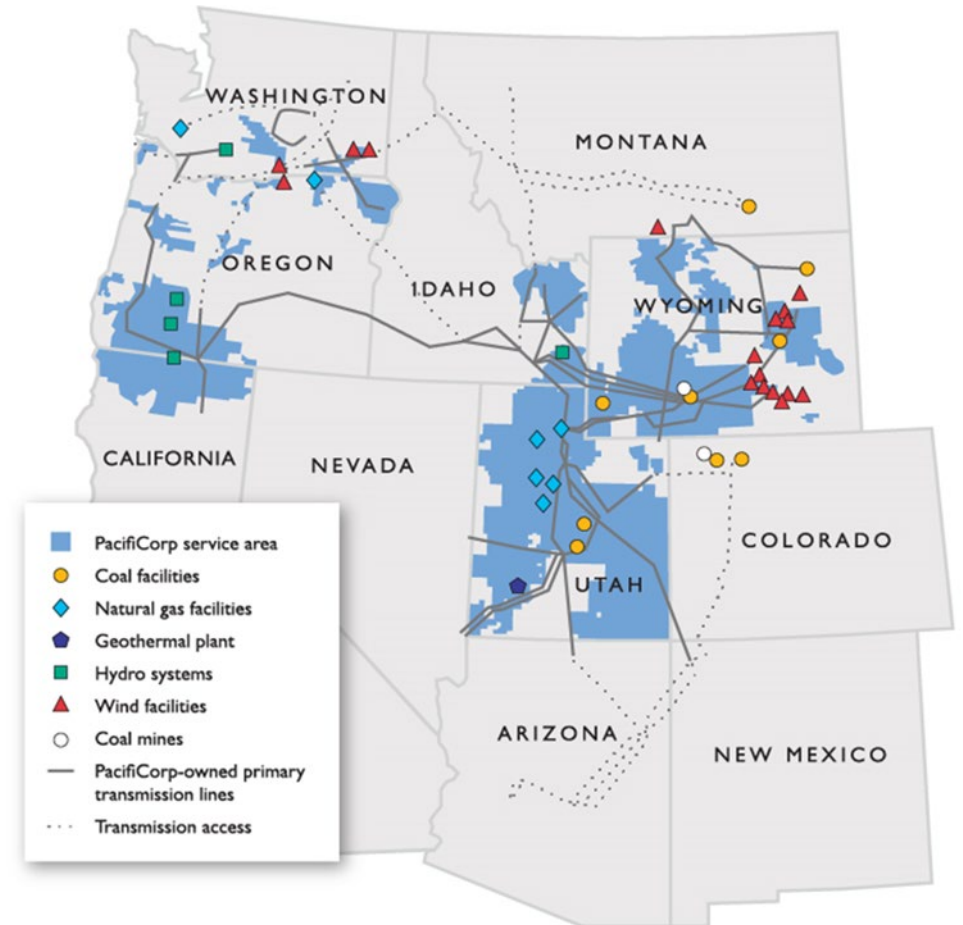

Thomas Burns
Vice President, Resource Planning and Acquisitions

Oregon House of Representatives
Committee on Climate, Energy and Environment
January 18, 2023

PacifiCorp

- PacifiCorp is a multi-jurisdictional electric utility that serves customers in six states - OR, CA, WA, ID, UT and WY.
- PacifiCorp leverages the load diversity across its service area and expansive transmission system to reduce costs for customers.
- PacifiCorp's system provides access to some of the best renewable resource locations and market hubs in the West, while avoiding third-party wheeling costs.
- In Oregon, PacifiCorp operates as Pacific Power, serving over 610,000 customers across the state.

Integrated Resource Planning: 2040 GHG Plan

- PacifiCorp has been on a trajectory to decarbonize its total system.
- PacifiCorp's Integrated Resource Plan (IRP) is a plan to serve PacifiCorp's customers across all six states. Our 2021 IRP projected system-wide emissions reduction of approximately 70% below 2005 baseline by 2030.
- The Oregon Clean Energy Plan (CEP) works in conjunction with PacifiCorp's system IRP and provides certainty to our target emissions reductions.
- The company will file its first CEP concurrently with its IRP in spring 2023.
- The CEP will include:
 - A clean energy strategy with proposed specific actions to meet outlined milestones; and
 - Discussion of how the company will comply with the requirements to provide 100% carbon free electricity to its Oregon retail customers by 2040.

Elements of the Clean Energy Plan

- Key elements of the CEP:
 - Transition to carbon-free electricity for Oregon retail customers
 - Increased focus on resiliency
 - Community-based renewable energy
 - Community and stakeholder engagement
- Scoping out opportunities, barriers and timeline informed by community and stakeholder engagement, which will continue through 2023 and beyond.
- The company has convened an equity advisory group in Oregon to focus on equity and a clean energy future in accordance with HB 2021.
