

The Legislature should NOT be converting Rural Reserves to industrial uses. Too many of us have fought too hard — and not that long ago — to assure a 50 year supply of some of the world's best soils for agricultural uses in the Hillsboro and Helvetia areas targeted now for "development".

At age 83, I am now retired from public leadership and activism, but I cannot sit out this attempted raid of Rural Reserves. It disregards law, good faith, good science — and common sense about the future needs of Washington County communities.

Please reject the proposed changes to Rural Reserves!!

Linda B. Peters
