BACKGROUND:

Oregon’s agriculture is a \$45 billion industry and approximately 14% of Oregonians, located in all counties, rely on agriculture for their livelihoods. It is estimated that over 250 diverse agricultural products are grown in the state. The COVID-19 global pandemic as well as recent wildfire events affected farmworker populations and the agricultural sector as a whole, but the extent of their effects are not fully quantified.

House Bill 3244 would establish a task force on the Economic Competitiveness of Oregon Agriculture.
