BACKGROUND:

HB 2296 (2013) created a new corporation status for benefit companies. A benefit company is a type of corporation or limited liability company that considers its impact on society and the environment in addition to earning a profit. Benefit company status only affects corporate purpose, accountability, and transparency and does not change tax or tax-exempt status. As of March 2023, there are currently 2,635 active benefit companies operating in Oregon.

House Bill 3572 allows contracting agencies to grant preference to procuring public use goods and services by a benefit company, whose majority of their regular and full-time workforce operates in Oregon at the time of bidding. It allows procurement preference only if goods and services are not more than five percent of the goods and services available from a non-benefit company contractor.
