#### **ISSUES DISCUSSED:**

#### **EFFECT OF AMENDMENT:**

-A4 Replaces the measure. Allows the Oregon Board of Dentistry to require an applicant for certification to pass a written examination. Requires that written examinations must be administered by a dental education program that is accredited by the American Dental Association and offered in, at minimum, the three most-spoken languages in the state. Prohibits requirement of more than one written examination for certification for dental assistants.

#### **BACKGROUND:**

In Oregon, dental assistants are not licensed, but must be certified to take X-rays or perform other expanded functions. Current Oregon Administrative Rules allow licensed dentists to authorize certified dental assistants to place films/sensors, adjust equipment preparatory to exposing films/sensors, and expose the films and create the images under general supervision. Dental assistants who have completed a course of instruction approved by the Oregon Board of Dentistry and passed the written Dental Radiation Health and Safety Examination administered by the Dental Assisting National Board, or comparable exam, may perform the same duties under the indirect supervision of a dentist, dental therapist, dental hygienist, or dental assistant who holds an Oregon Radiologic Proficiency Certificate.

House Bill 3223 A prohibits the Oregon Board of Dentistry from requiring dental assistant certification applicants pass a written examination and requires the Board to adopt rules establishing alternative pathways to certification.
