SUMMARY

Exempts from required disclosure records concerning cybersecurity plans, devices and systems, including contractual and insurance records setting forth specifications, applications and coverages.

OPEN GOVERNMENT IMPACT

Legislative Counsel has not adopted standards for drafting measures that establish exemptions from disclosure of public records.

This measure exempts from public disclosure documents, records and plans for protection relating to the existence, nature, location or function of cybersecurity devices, programs or systems designed to protect computers, information technology or communications systems against threat or attack.

If those public records that could be subject to public disclosure were instead subject to mandatory disclosure under public records law, the public could receive information related to equipment, programs and strategies designed to protect against cybersecurity threats.
