"Whereas Oregonians need access to educational opportunities beyond high school and throughout life; and

"Whereas the Legislative Assembly has found that Oregonians need to cultivate an advanced literacy essential to leading productive and rewarding lives, including the capacity to think logically and critically; to internalize and exemplify humane values; to write, speak and figure clearly and accurately; to understand, in some depth, a variety of psychological, historical, cultural, aesthetic and scientific concepts and theories; and to master a range of occupational, professional, avocational, social and personal skills; and

"Whereas the State of Oregon has adopted ambitious educational goals wherein, by the year 2025, 100 percent of Oregon students will graduate from high school, with at least 40 percent earning an associate’s degree or certificate, another 40 percent earning a baccalaureate degree or higher and another 20 percent entering the workforce; and

"Whereas performance on key student outcomes and outcomes for historically underserved populations must improve rapidly for this state to meet the 40-40-20 goal; and

"Whereas in 2018 the Seventy-ninth Legislative Assembly established a Joint Committee on Student Success to create a plan to improve educational outcomes for K-12 students throughout Oregon; and

"Whereas in 2019 the Eightieth Legislative Assembly passed the Student Success Act to meet specific K-12 student needs, including physical health and safety, mental or behavioral health, increased instructional time, reduced class sizes or staff case loads, and the need to broaden curricular opportunities; and

"Whereas in 2019 the Eightieth Legislative Assembly established the Fund for Student Success to receive net revenues from a corporate activity tax; and

"Whereas in 2021 the Eighty-first Legislative Assembly established the bicameral, bipartisan Task Force on Student Success for Underrepresented Students in Higher Education to develop student success policy and funding proposals focused on increasing the likelihood of student success in higher education for students who have been historically underrepresented; and

"Whereas the task force found that there is a strong relationship between affordability and completion, with students more likely to graduate in less time when the cost of attendance is more affordable; and

"Whereas the task force found that the high costs of housing, child care, transportation and Internet access are additional affordability challenges faced by underrepresented students; and

"Whereas the task force found that combined state and federal grant aid for a student at the lowest income level is insufficient to meet the full cost of attendance at many public institutions of
higher education in Oregon; now, therefore,”.
