

A-Engrossed
House Bill 3097

Ordered by the House March 13
Including House Amendments dated March 13

Sponsored by COMMITTEE ON AGRICULTURE, LAND USE, NATURAL RESOURCES, AND WATER (at the request of Representative Ken Helm)

SUMMARY

The following summary is not prepared by the sponsors of the measure and is not a part of the body thereof subject to consideration by the Legislative Assembly. It is an editor's brief statement of the essential features of the measure.

Provides that municipal corporation or people's utility district may apply for certificate to use water for hydroelectric purposes within **piped conduit in** artificial delivery system **that is delivering water for municipal uses** even if municipal corporation or people's utility district is not holder of underlying **municipal** water right, with permission of holder of underlying **municipal** water right.

A BILL FOR AN ACT

1
2 Relating to certificates to use water for hydroelectric purposes within an artificial delivery system;
3 creating new provisions; and amending ORS 497.141 and 543.765.

4 **Be It Enacted by the People of the State of Oregon:**

5 **SECTION 1.** ORS 543.765 is amended to read:

6 543.765. (1) Notwithstanding ORS 537.145 and ORS chapter 543[,]:

7 (a) The holder of a water right may apply to the Water Resources Department for a certificate
8 to use water for hydroelectric purposes within an artificial delivery system under the applicant's
9 existing water right.

10 (b) **A municipal corporation or people's utility district, as defined in ORS 261.010, may**
11 **apply to the department for a certificate to use water for hydroelectric purposes within a**
12 **piped conduit in an artificial delivery system that is delivering water for municipal uses even**
13 **if the municipal corporation or people's utility district is not the holder of the underlying**
14 **municipal water right, if the municipal corporation or people's utility district obtains from**
15 **the holder of the underlying municipal water right, and provides to the department with the**
16 **application, a written statement authorizing the municipal corporation or people's utility**
17 **district to use the water for hydroelectric purposes.**

18 (2) If the proposed hydroelectric project meets the applicable capacity limitation under this
19 subsection and meets either the qualifications for a Federal Energy Regulatory Commission ex-
20 emption from licensing or similar qualifications of another federal agency responsible for authorizing
21 the project, the applicant may use the expedited application process under this section regardless
22 of which federal agency issues the authorization. To qualify under this subsection:

23 (a) For a project that is to be built as part of an existing dam, the capacity may not exceed five
24 megawatts. Subsection [(5)(b)] **(6)(b)** of this section does not apply to a project described in this
25 paragraph.

26 (b) For in-conduit projects, the capacity may not exceed 15 megawatts for a nonmunicipal facil-

NOTE: Matter in **boldfaced** type in an amended section is new; matter [*italic and bracketed*] is existing law to be omitted. New sections are in **boldfaced** type.

1 ity or 40 megawatts for a municipal facility. Projects described in this paragraph must comply with
2 subsection [(5)(b)] **(6)(b)** of this section.

3 [(2)] **(3)** An application, which shall be on a form provided by the Water Resources Department,
4 for a hydroelectric certificate under this section must include:

5 (a) The certificate number, or decree reference if no confirming certificate has been issued, of
6 the applicant's existing water right, **or the underlying water right**, associated with the proposed
7 hydroelectric project.

8 (b) A copy of either a Federal Energy Regulatory Commission exemption application or a similar
9 application submitted to the federal agency responsible for authorizing the project, if applicable.

10 (c) A proposed schedule of annual water use and an estimate of the maximum power generation
11 of the proposed hydroelectric project.

12 (d) A statement by the applicant that the amount of water used by the proposed hydroelectric
13 project will not exceed the amount authorized and used under the applicant's existing water right,
14 **or the underlying water right**, for beneficial use without waste.

15 (e) A statement that the applicant owns or otherwise controls the water conveyance system.

16 (f) An application processing fee of \$500. The department shall deposit fees collected under this
17 section into the Water Resources Department Hydroelectric Fund established pursuant to ORS
18 536.015.

19 (g) A map or drawing and all other data concerning the proposed hydroelectric project, as may
20 be prescribed by the department. The map or drawing must be of sufficient quality and scale to es-
21 tablish the location of the existing point of diversion and the proposed location of the hydroelectric
22 project.

23 (h) If the water to be used for the proposed hydroelectric project is delivered by a public entity
24 other than the applicant for a certificate under this section, a statement from that entity that the
25 entity will be able to deliver water as described in the application.

26 (i) Evidence that the water has been used over the past five years according to the terms and
27 conditions of the applicant's existing water right, **or the underlying water right**, described in
28 paragraph (a) of this subsection.

29 [(3)] **(4)** If an applicant provides the information required by subsection [(2)] **(3)** of this section:

30 (a) The Water Resources Department shall provide notice to both the State Department of Fish
31 and Wildlife and the public, and provide a 30-day period for public comment.

32 (b) The Water Resources Department may issue a final order and certificate to use water for
33 hydroelectric purposes upon making a final determination that the proposed hydroelectric use does
34 not impair, or is not detrimental to, the public interest in the manner provided in ORS 537.170 (8).

35 [(4)] **(5)** If the Water Resources Department determines that public interest issues have been
36 identified, the department shall issue a final order denying the application. The department shall
37 also issue a final order denying the application if the department identifies issues related to the
38 public interest. If the applicant does not appeal the final order as provided in ORS chapter 183 and,
39 within one year of the department's final order denying the applicant's application, files an appli-
40 cation with the department for a preliminary permit to operate a hydroelectric project as provided
41 in ORS 537.130 and 543.210, the applicant shall receive a credit toward the applicant's application
42 fees in the amount of \$500.

43 [(5)] **(6)** At a minimum, a certificate issued under this section must contain the following condi-
44 tions:

45 (a) Except as provided in paragraph (b) of this subsection, fish screens, by-pass devices and fish

1 passages as required by the State Department of Fish and Wildlife.

2 (b) If the application is for a hydroelectric project that is to be installed in or on a conduit de-
3 livery system, the certificate does not need to include a requirement for fish passage at the diversion
4 point for the conduit delivery system if:

5 (A) The hydroelectric generating equipment for the project is not located on a dam;

6 (B) The hydroelectric generating equipment for the project is installed within or at the end of
7 a conduit delivery system;

8 (C) The conduit delivery system is operated for the distribution of water for agricultural, mu-
9 nicipal or industrial consumption; and

10 (D) Except as provided in subsection [(15)] (16) of this section, the certificate includes a condi-
11 tion for the making of annual payments under subsection [(14)] (15) of this section.

12 (c) That use of water be limited to periods when the applicant's existing water right, **or the**
13 **underlying water right**, is put to beneficial use without waste and that the amount used is not
14 greater than the quantity of water diverted to satisfy the authorized specific use under the existing
15 water right, **or the underlying water right**, described in subsection [(2)(a)] (3)(a) of this section.

16 (d) That use of water be limited by rate, duty, season and any other limitations of the applicant's
17 existing water right, **or the underlying water right**, described in subsection [(2)(a)] (3)(a) of this
18 section.

19 (e) That the applicant measure and report the quantity of water diverted.

20 (f) That the restrictions established in ORS 543.660 shall apply as conditions of use to a certif-
21 icate issued under this section to a district as defined in ORS 543.655.

22 (g) That a certificate issued under this section shall be invalidated upon a change in the point
23 of diversion of the existing water right, **or the underlying water right**, described in subsection
24 [(2)(a)] (3)(a) of this section.

25 (h) That the right to use water under a certificate issued under this section is invalidated if the
26 federal exemption or authorization related to the certificate is canceled or invalidated.

27 (i) Any other conditions the Water Resources Department deems necessary to protect the public
28 interest.

29 [(6)] (7) The Water Resources Department shall conduct a review of certificates issued under
30 this section and shall issue a final order and a superseding certificate that corresponds to any
31 changes or adjustments made to the applicant's existing water right, **or the underlying water**
32 **right**, described in subsection [(2)(a)] (3)(a) of this section.

33 [(7)] (8) Subsection [(5)(b)] (6)(b) of this section does not affect any requirement for fish passage
34 applicable to a project that is otherwise required by law.

35 [(8)] (9) Upon request, the State Department of Fish and Wildlife and the Water Resources De-
36 partment shall arrange a preapplication meeting with a person to discuss the requirements associ-
37 ated with the installation of a hydroelectric project in an artificial delivery system.

38 [(9)] (10) A certificate issued under this section may not have its own priority date. The Water
39 Resources Department may not regulate for or against any certificate issued under this section
40 based on the priority date of the certificate.

41 [(10)] (11) A certificate issued under this section does not grant a right to divert water for hy-
42 droelectric purposes.

43 [(11)] (12) A certificate issued under this section may not be included in the determination of
44 injury to other water rights pursuant to ORS chapter 540.

45 [(12)] (13) A certificate issued under this section is subject to review 50 years after the date of

1 issuance and pursuant to the terms described in this section.

2 [(13)] (14) Failure to fully develop and put to use a certificate issued under this section within
3 five years of issuance invalidates the hydroelectric certificate.

4 [(14)(a)] (15)(a) If a certificate contains a condition described in subsection [(5)(b)] (6)(b) of this
5 section for annual payments, the payment shall be collected as provided in paragraph (c) of this
6 subsection. Except as provided in paragraph (b) of this subsection, the annual payment amount must
7 be:

8 (A) Except as provided in subparagraph (D) of this paragraph, for the first five years, four times
9 the base hydropower fee amount assessed for the project under ORS 543.078 for the year.

10 (B) Except as provided in subparagraph (D) of this paragraph, for the 6th through 10th years,
11 eight times the base hydropower fee amount assessed for the project under ORS 543.078 for the year.

12 (C) Except as provided in subparagraph (D) of this paragraph, after the 10th year, 15 times the
13 base hydropower fee amount assessed for the project under ORS 543.078 for the year.

14 (D) \$100 for any year in which the base hydropower fee amount assessed for the project under
15 ORS 543.078 is less than \$100.

16 (b) If the certificate is for a hydroelectric project that will operate on a partial-year basis, the
17 fee shall be three-fifths of the amount established in paragraph (a) of this subsection.

18 (c) The Water Resources Department shall collect the fee on behalf of the State Department of
19 Fish and Wildlife and forward the fee moneys for crediting to the Fish Passage Restoration Subac-
20 count created under ORS 497.141.

21 [(15)(a)] (16)(a) Notwithstanding subsection [(14)] (15) of this section, a certificate for a project
22 to install hydroelectric generating equipment as described in subsection [(5)(b)] (6)(b) of this section
23 may provide for the termination of annual payments being made under subsection [(14)] (15) of this
24 section if, after the date the project commences operation:

25 (A) The project provides for fish passages;

26 (B) There is an agreement between the applicant and the State Department of Fish and Wildlife
27 providing for fish passages associated with the project; or

28 (C) A waiver or exemption has been issued under ORS 509.585 for the project.

29 (b) A certificate for a project to install hydroelectric generating equipment as described in
30 subsection [(5)(b)] (6)(b) of this section does not need to include a condition for the making of annual
31 payments under subsection [(14)] (15) of this section if:

32 (A) There is an agreement between the applicant and the State Department of Fish and Wildlife
33 providing for the conduit delivery system to have fish passages associated with the project; or

34 (B) A waiver or exemption has been issued under ORS 509.585 for the project.

35 [(16)] (17) If a certificate under this section is issued, the certificate holder must pay fees con-
36 sistent with the fees described in ORS 543.078. Failure to pay a required fee invalidates a certificate
37 issued under this section.

38 [(17)] (18) The Water Resources Department shall issue invoices for fees required under this
39 section, and the state shall have a preference lien for delinquent fees, as provided in ORS 543.082.

40 [(18)] (19) An applicant for a certificate issued under this section must provide evidence of a
41 Federal Energy Regulatory Commission exemption or approval under a similar process by the fed-
42 eral agency responsible for authorizing the project before a certificate can be issued, if applicable.

43 [(19)] (20) Nothing in this section shall alter the preference of municipalities in ORS 543.260 (3)
44 and 543.270.

45 **SECTION 2. On or before December 31, 2024, to implement the amendments to ORS**

1 **543.765 by section 1 of this 2023 Act, the Water Resources Department may amend OAR**
2 **690-051-0050 (5)(b), if needed, to require that a municipal corporation or people's utility dis-**
3 **trict that applies for a certificate to use water for hydroelectric purposes within an artificial**
4 **delivery system as described in ORS 543.765 (1)(b) must provide the department with a writ-**
5 **ten statement from the holder of the underlying water right authorizing the municipal cor-**
6 **poration or people's utility district to use the water for hydroelectric purposes.**

7 **SECTION 3.** ORS 497.141 is amended to read:

8 497.141. (1) There is created a Fish Passage Restoration Subaccount within the Fish Passage
9 Fund established under ORS 497.139. Fees described in ORS 543.765 [(14)] (15) shall be paid into the
10 subaccount. The State Department of Fish and Wildlife may solicit and accept additional moneys for
11 crediting to the subaccount, including but not limited to federal funds, appropriations, donations,
12 grants from nongovernmental entities and moneys from other public or private sources. Any interest
13 earned by moneys within the subaccount shall be credited to the subaccount.

14 (2) The department shall use the subaccount moneys to fund priority fish passage restoration
15 projects. The department shall give priority to the funding of projects on the statewide inventory
16 of artificial obstructions priority list described in ORS 509.585, with an emphasis on those statewide
17 priority list projects that also pay fees under ORS 543.765 [(14)] (15), and give priority to projects
18 that have the ability to leverage matching dollars. The department may not use subaccount moneys
19 to fund culvert projects or projects that are state-owned structures. The department may not ex-
20 pend more than six percent of the annual contributions to the subaccount to pay staffing costs as-
21 sociated with the advancement of capital projects funded by the subaccount.

22
