215.246. (1) The uses allowed under ORS 215.213 (1)(y) and 215.283 (1)(v):

(a) Require a determination by the Department of Environmental Quality, in conjunction with the department’s review of a license, permit or approval, that the application rates and site management practices for the land application of reclaimed water, agricultural or industrial process water or biosolids ensure continued agricultural, horticultural or silvicultural production and do not reduce the productivity of the tract.

(b) Are not subject to other provisions of ORS 215.213 or 215.283 or to the provisions of ORS 215.274, 215.275 or 215.296.

(b) Significantly increase the cost of accepted farm or forest practices on surrounding lands devoted to farm or forest use.

(2) An applicant for a use allowed under ORS 215.213 (2) [or (11)] or 215.283 (2) [or (4)] may demonstrate that the standards for approval set forth in subsection (1) of this section will be satisfied through the imposition of conditions. Any conditions so imposed shall be clear and objective.

(5) Upon a determination that the allegations made in a complaint are true, the local governing body or its designee at a minimum shall notify the violator that a violation has occurred, direct the violator to correct the conditions that led to the violation within a specified time period and warn the violator against the commission of further violations.

(6) If the conditions that led to a violation are not corrected within the time period specified pursuant to subsection (5) of this section, or if there is a determination pursuant to subsection (4) of this section following the receipt of a second complaint that a further violation has occurred, the local governing body or its designee at a minimum shall assess a fine against the violator.
