

Submitter: Lisa Scrimenti  
On Behalf Of:  
Committee: Senate Committee On Rules  
Measure: HB2004

I strongly oppose this bill. It eliminates One Vote Per Citizen. RCV is messy and ends up not representing the will of the people. Also, the change to an RCV system is highly expensive and that expense will undoubtedly be passed on to me and my family and friends as yet another tax. Further, the Oregon AG has openly admitted that the current electronic voting systems are hackable. Why add more electronic systems that are hackable and have no clear structure or process for forensic auditing? After all, our DMV information was recently hacked, so how can anyone possibly believe that a ranked electronic voting system will be safe and transparent? How can we trust a new system that is as complicated and confusing as the proposed RCV voting structure? Respectfully, please do NOT pass this bill.
