

Submitter: Yvonne Elkins

On Behalf Of:

Committee: Senate Committee On Rules

Measure: HB2004

This bill makes absolutely no sense at all. We've got enough problems counting votes as it is we don't need more complications. I believe this is one more way to camouflage voter discrepancies. The cost of verifying this method of voting would be substantial if indeed, it were possible to do it accurately. Also, the cost of implementing the system would be extensive. Use that money that you propose to spend on this measure to help correct the system we have now and make it more reliable and unhackable!
